

Athboy Community School

Work Experience Policy

Ratified September 2024

Introduction:

The school Board of Management recognises the need to manage students on work experience and are committed to ensuring that appropriate procedures are in place to support the planning, managing and operation of students on work experience together with the risk assessment and evaluation processes.

The Board of Management will be adopting the State Claims Agency 'Student Work Experience Programmes Guide' in association with the Association of Community and Comprehensive Schools (November 2022) as Athboy Community Schools guideline and procedure for managing the student work experience programme.

This will remain the school's policy and procedure for managing the schools work experience programme until such time that there is a change in the above guidance document or approach.
